

CURRENT PIPELINE PRODUCTS™

A division of IMAC Systems, Inc.

BARLOW FLANGE INSULATED JOINTS

Barlow Flange Insulated Joints are welded into place for a permanent solution. Factory manufactured Barlow eliminates the need for kits, and no field assembly is required. Each joint is tested, ready for installation—its mechanical design resists effects of stress and the resulting insulation failure.

LEADING CATHODIC SOLUTIONS

ALFA MONOLITHIC ISOLATION JOINTS

For long-term dependability experts choose ALFA. ALFA Monolithic Isolation Joints serve as a positive leak-proof, long-lasting block against the flow of electric current in piping systems. These joints are factory manufactured and tested, no field assembly required, eliminates short circuits and guarantees performance.

SURGE ARRESTORS

Barlow TMK Surge arrestors are available in a variety of options including brass brackets, wire lugs, enclosures, and multiple discs. TMK Surge Arrestors curb the electrical breakdown of insulated joints by limiting potentially dangerous voltage levels without interfering with cathodic protection.
